-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1652

It is noted that Mavrodi, et al. (AH1) is not cited in the parent application or included with the IDS filed 3/26/04. However, because the examiner could obtain a copy readily he has done so and the reference is initialed on the PTO-1449 filed 3/26/04.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The instant specification teaches a polypeptide comprising PhxO monooxygenase having SEQ ID NO:2 and encoded by SEQ ID NO:1. The specification does not teach a polypeptide encoded by a sequence 50% or 60% identical with SEQ ID NO:1 nor one that hybridizes under medium stringency, nor a subsequence of this nucleotide, nor a polypeptide having 60% identity to SEQ ID NO:2 nor a polypeptide encoded by a subsequence of a nucleotide of at least 100 nucleotides of the polynucleotide encoding the SEQ ID NO:2. There is nothing taught concerning enzyme such as the active site of the enzyme, the binding site, etc. that would lead one of ordinary skill to know what regions are important for activity of the enzyme. Therefore it is maintained that there would undue experimentation required to practice the invention within the scope of the instant claims. In order to allow for allelic variants the examiner will allow claims drawn to 95% identity.
